Qualys Express

To keep your mid-market business safe from growing Internet threats and automated attacks

When data breaches hit the news, no one wants their company to be in the headline. The fallout of a breach or failed audit can devastate businesses of all sizes, across verticals and geographies. These consequences can include financial losses and penalties, as well as the loss of customer trust as they take their business elsewhere.

Fortunately, Qualys offers a simple, cloud-based security & compliance solution to help you identify your cyber vulnerabilities, stop attacks before the damage occurs, and automatically manage your IT assets and comply with regulations. It's called Qualys Express.

Why You Need Qualys Express

Qualys Express takes the stress out of protecting your business. Because Qualys runs everything for you in the cloud, all you need to do is launch security & compliance scans from your browser. Qualys does the rest by continuously monitoring your network,

systems and web apps to automatically find vulnerabilities, pinpoint out-of-policy system configurations, and tell you what and how to fix these exposures. It's fast, easy to use, and doesn't require you to hire a team of experts to reap these benefits.

Why Qualys?

Affordable – No servers to buy or set up – it's all in the Cloud. You get a predictable cost every year.

Fully Automated – Scans, validates, and organizes findings and prioritized recommendations – including a separate view for business unit administrator.

Accurate – Consistently exceeds Six Sigma 99.99966% accuracy. Tells you actionable and relevant data so you don't waste any time.

Easy-to-Use – No software to maintain; instant and secure access from any browser.

Scalable – As your business grows, Qualys Express easily scales with your needs.

Rich Integration – Full data and control APIs for connecting your existing systems. You get better intelligence by data correlation and seamless integration with trouble ticketing.

Market Leader – IDC ranks Qualys #1 in Device Vulnerability Assessment and Gartner awards Qualys the highest possible rating in its MarketScope for Vulnerability Assessment.

What Express Does for You

Qualys uses the power of the cloud to simplify your IT security and lower the cost of compliance. It helps you keep track of your networks, computers and web applications, and accurately tells you where they're vulnerable so that you can fix problems *before* attackers find you. It also automates many of the tedious parts of complying with regulations and laws such as PCI, HIPAA and FISMA.

Express Guides You, Step by Step

There are three especially critical elements that can help a mid-market business continuously manage its lifecycle of security & compliance.

Asset Management. Express tells you exactly what IT assets are installed in your environment, how they are configured, and automates their management. Monitor and assess your servers, endpoints and web apps whether publicly accessible or behind your firewall. This includes remote and roaming assets (e.g. mobile), and assets located in public, private and hybrid clouds. Key features:

- Discover rogue devices & web applications
- Automatically identify, tag and organize assets
- Dynamically select assets for scanning or reporting

Network Security. See where you're exposed to hackers, and learn how to fix. Express helps you stop hackers from sneaking into your systems and web apps – even against emerging Zero-Day attacks. Key features:

- Find and track vulnerabilities in
  - Perimeter servers & devices
  - Web apps & websites
  - On-premise networks
  - Amazon EC2 networks
- Report security trends across systems & time
- Identify needed patches
- Interactively view security posture throughout your network
- Feed actionable security data to SIEM, GRC, ERM, WAF systems and more

Compliance. Test your computers' password controls and compliance policies. Key features:

- Verify that systems implement required controls (such as password enforcement and information access policies)
- Test system configurations against golden images or baseline standards such as USGCB
- Test and submit PCI certification online
- Check for compliance with HIPAA, SOX, GLBA, Basel II, and more
- Automate procedural questionnaires for employees, vendors and partners

Web Application Security. With the built-in Web Application Scanning service, you can quickly search your web forms and apps for vulnerabilities. These include hackers' favorite exploits such as SQL Injection, Cross-Site Scripting and Cross-Site Request Forgery. With Qualys Express, you'll find these vulnerabilities and learn how to quickly fix them. You'll also protect your business reputation by eliminating malware snuck in by hackers, such as drive-by downloads inserted into blogs or comment pages.

Full Suite of Integrated Solutions

Qualys Express fully integrates all Qualys stand-alone services under one easy-to-use browser control panel. All are supported by the Qualys Cloud Platform to seamlessly scan and control IT security & compliance for all assets – whether on your enterprise network, in remote or mobile locations, or in elastic virtual environments. The suite includes:
- CM – Continuous Monitoring
- VM – Vulnerability Management
- PC – Policy Compliance
- PCI – PCI Compliance
- SEAL – Qualys Secure Seal
- WAS – Web App Scanning
- WAF – Web App Firewall
- MD – Malware Detection
- QS – Questionnaire Service

Qualys Cloud Security & Compliance Platform

The Qualys Cloud Platform hosts a suite of IT security & compliance solutions that leverage shared and extensible core services and a highly scalable multi-tenant cloud architecture. The core services include:
- Asset Tagging & Management
- Remediation & Workflow
- Reporting & Dashboards
- Big Data Correlation & Analytics Engine
- Questionnaires & Collaboration
- Alerts & Notifications
