

Bay Dynamics Risk Fabric Integration with Qualys

Key benefits of the integration:

- Proactive identification of exploitable critical systems and applications
- Actionable cyber risk insights through correlation of relevant vulnerability and compliance data
- Effective response through prioritization and remediation of vulnerabilities

Overview

Bay Dynamics Risk Fabric integration with Qualys enables organizations to effectively manage cyber risk and maintain a healthy cybersecurity posture. Bay Dynamics Risk Fabric Platform with its user behavior and predictive analytics approach, assembles and correlates relevant vulnerability and compliance data from Qualys along with other existing tools to provide actionable insights into cybersecurity blind spots. The integration is seamlessly enabled by an out-of-the-box connector. Bay Dynamics Risk Fabric and Qualys work together to provide visibility into critical threats and help prioritize response based on comprehensive threat visibility.

Bay Dynamics Risk Fabric Platform

Bay Dynamics Risk Fabric is a purpose-built cyber risk predictive analytics platform that assembles and correlates relevant data in a novel patented way to provide actionable visibility into cybersecurity blind spots, before it's too late.

Bay Dynamics Solutions

Bay Dynamics Risk Fabric Platform powers following solutions:

Insider Threat - Identifies the top insider threats and provides a prioritized list of insider threats, anomalous behavior reports and automated incident management workflow

Outsider Threat – Identifies the top outsider threats by correlating outside attacks with inside malicious activity. Provides a prioritized list of outsider threats and automated remediation

High Privilege Access – Proactive identification of high-risk users and highprivilege accounts. Rich correlation and contextualization of critical assets with observed and unusual user behavior

Attack Surface Threat – Proactive identification of exploitable critical assets. Rich correlation across compliance information, threat indicators and vulnerabilities in applications and systems

About Bay Dynamics

Bay Dynamics® is the market leader in cyber risk predictive analytics providing actionable visibility into organizations' cybersecurity blind spots, complete with business risks and threats. The company's purpose-built Risk Fabric® platform assembles and correlates relevant data from existing tools in a novel patented way to provide actionable cyber risk insights, before it's too late. Bay Dynamics enables some of the world's largest organizations to understand the state of their cybersecurity posture, including contextual awareness of what their insiders, vendors and bad actors are doing, which is key to effective cyber risk management.

About Qualys

Qualys, Inc. (NASDAQ: QLYS) is the pioneer and leading provider of cloud security and compliance solutions with over 7,700 customers in more than 100 countries, including a majority of each of the Forbes Global 100 and Fortune 100. The Qualys Cloud Platform and integrated suite of solutions help organizations simplify security operations and lower the cost of compliance by delivering critical security intelligence on demand and automating the full spectrum of auditing, compliance and protection for IT systems and web applications. Founded in 1999, Qualys has established strategic partnerships with leading managed service providers and consulting organizations, including Accenture, Accuvant, BT, Cognizant Technology Solutions, Dell SecureWorks, Fujitsu, HCL Comnet, InfoSys, NTT, Tata Communications, Verizon and Wipro. The company is also a founding member of the Cloud Security Alliance (CSA) and the Council on CyberSecurity.
