

Qualys Express Lite

For helping you know where your small business is vulnerable to hackers – and how to stop them

As a small business owner, you should be concerned about hackers because your business is a prime target for attacks over the Internet. Consider that:

- Half of all small businesses have been victims (National Small Business Administration)
- 71% of attacks hit businesses with under 100 employees (Verizon Business)
- Last year, the average data breach cost a small business \$20,752 – up from \$8,600 in 2013 (NSBA)
- 60% of small businesses breached close in six months (National Cyber Security Alliance)

Fortunately, there is a simple, cloud-based security solution from Qualys that can help you identify your cyber vulnerabilities and stop attacks before the damage occurs. It's called Qualys Express Lite.

Why You Need Qualys Express Lite

A small business faces a mountain of challenges to achieve success. As the owner, you are responsible for everything – and often it seems like you must *do* everything to stay in the game. This can be overwhelming, especially for addressing a technical challenge like cyber security. And that's where Qualys Express Lite is your best friend.

Qualys Express Lite takes the stress out of protecting your business from hackers. Qualys runs everything for you in the cloud. All you need to do is launch security scans with your browser. Qualys does the rest by continuously monitoring your network, systems and web apps to automatically find vulnerabilities, and telling you what to fix. It's fast, easy to use, and doesn't require you to install new gear or hire a team of experts to get these benefits.

Why Qualys?

Easy – No software to maintain; used right from your browser.

Affordable – No servers to buy or set up.

Automated – Scans, organizes, prioritizes, reports.

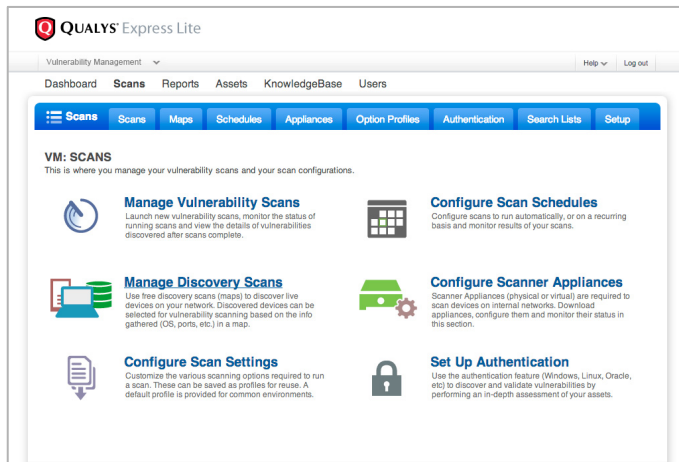

Accurate – Tells you what you need to know without wasting your time.

Cloud Platform – Cloud-based “software as a service” that's professionally managed 24x7x365 in Qualys' world-class data center.

Market Leader – Thousands of organizations of all sizes around the world rely on Qualys.

What Express Lite Does for You

Qualys Express Lite is a cloud-based suite of security and compliance solutions for the typical small business with limited budget and staff. It lets you monitor security right from your browser. It applies continuous monitoring to your Internet perimeter servers, websites and web apps (which hackers often target first) to ensure that security controls are up-to-date and properly configured. It even lets you extend the same protection to your internal computers to make your business safer – inside and out.

Since time is of the essence when Internet hackers target your network, Qualys Express Lite helps you discover security holes fast and fix them before you get attacked. Qualys Express Lite also makes it easier to comply with rules such as PCI and HIPAA that require you to periodically audit your network and fix any critical security vulnerabilities that you find.

Express Lite Guides You, Step by Step

Monitor Your Internet Perimeter – Servers & Web Apps. With Qualys, you can check right from your browser whether your Internet-facing servers, websites and web apps are up to date and securely configured against Internet attackers. Step by step instructions guide you through scanning, using generated reports and improving your security.

Scan Your Internal Network. Monitor your internal servers, computers and web apps to see if they are up to date and properly configured against attacks. Qualys manages security and compliance for your internal and perimeter systems together in a single interactive web console.

Check Your Website & Apps for Top Risks and Malware. With the built-in Web Application Scanning feature, you can quickly search your web forms and apps for vulnerabilities. These include hackers' favorite exploits such as SQL Injection, Cross-Site Scripting and Cross-Site Request Forgery. Qualys Express Lite teaches you how to fix these vulnerabilities. It also helps you protect your business reputation by protecting visitors to your website from attacks by malware snuck in by hackers, such as in blogs or comment pages.

Stay on Top of the Latest Security Patches. Qualys Express Lite goes beyond listing which devices are at risk of being attacked. It also tells you which vendor-supplied patches you need to fix the problems, and helps you to download them for installation.

Know if you're PCI Compliant – Before Your Audit. With Qualys Express Lite, you can check whether your systems are PCI-compliant at any time. This capability allows you to address issues early and submit quarterly PCI scanning results once you know you've already passed.

Customer Support On Demand. Qualys provides you with free 24x7 customer and technical support. You can also attend our free training and certification classes, user conferences and seminars. These may be useful as your technology infrastructure expands to meet the needs of your growing business.

Or, Buy Features a la Carte

If you don't need all the functions of Qualys Express Lite, you may also purchase standalone cloud-based Qualys solutions. Options include:

- CM – Continuous Monitoring
- VM – Vulnerability Management
- PCI – PCI Compliance
- WAS – Web App Scanning
- WAF – Web App Firewall
- MD – Malware Detection

Try It and See How It Works for You!
