

Qualys Global AssetView (GAV) and CyberSecurity Asset Management (CSAM) Features

FEATURE	GAV (Free)	CSAM
 <p>Get complete visibility into your environment Discover and inventory all your assets</p> <p>Use multiple Qualys sensors to continually discover and inventory your assets. View information about servers, desktops, network, mobile and IoT in your on-premises and Cloud environments. Get detailed software and container information.</p>	✓	✓
 <p>View categorized and normalized hardware and software information Standardize your inventory</p> <p>Get clean and concise inventory with normalized manufacturer, product, hardware model and software information, saving hundreds of staff hours.</p>	✓	✓
 <p>Define criticality and find related assets Add business context through dynamic tagging</p> <p>Organize your inventory with dynamic tags to find assets related to business functions (e.g. finance), scope (e.g. PCI DSS compliance) and other factors relevant to your organization. Assign criticality based on tags to quickly focus on most critical assets.</p>	✓	✓
 <p>Find and upgrade unsupported software and hardware Know product lifecycle and support information</p> <p>The Qualys technology catalog automatically extends your IT asset inventory with non-discoverable asset metadata such as hardware and software product release and end-of-life dates, license categories and more.</p>		✓
 <p>Eliminate unauthorized software from your environment Quickly identify assets requiring attention</p> <p>Define unauthorized and authorized software. Detect assets with installations of unauthorized software and define appropriate actions to improve Asset Health.</p>		✓
 <p>Be informed about assets requiring attention Receive notifications to review and define actions</p> <p>Configure alerts to receive notifications about asset health issues related to end-of-life, installations of unauthorized software and more.</p>		✓
 <p>Inform stakeholders about health of your assets Create custom reports</p> <p>Inform internal stakeholders about health of your assets. Prepare compliance reports to help maintain industry compliance like PCI DSS and FedRAMP.</p>		✓
 <p>Easily keep your CMDB up to date Enable 2-way integration to sync with ServiceNow CMDB</p> <p>Synchronize inventory with ServiceNow CMDB to keep it up to date and enriched with hardware and software lifecycle and categorization information. Import business context data, including owners, environment, business application and other key data to improve response to asset health related issues. All using our certified ServiceNow app.</p>		✓
