Foster City, Calif., – July 31, 2018 – Qualys, Inc. For the quarter, the Company reported revenues of \$68.2 million, net income under Generally Accepted Accounting Principles (“GAAP”) of \$10.3 million, non-GAAP net income of \$16.4 million, Adjusted EBITDA of \$26.7 million, GAAP earnings per diluted share of \$0.24, and non-GAAP earnings per diluted share of \$0.39.

“We are very pleased with our second quarter results which were fueled by continued platform innovation and increased customer adoption of the Qualys Cloud Platform and its integrated Apps,” said Philippe Courtot, chairman and CEO of Qualys. “We believe we are uniquely positioned to enable customers to consolidate their security and compliance stack, drastically reducing their spend. In addition, our true platform approach provides our customers with a single-pane-of-glass view across on-premises assets, endpoints, clouds, and early next year, mobile environments. As we continue delivering additional best-of-breed detection and response capabilities through the Qualys Cloud Platform, we believe that our customers’ savings will compound. Furthermore, we are now well on our way to providing CIOs with a continuous and updated view of their global IT assets with two-way synchronization with their CMDBs. Such capability is the cornerstone of security, as without visibility, there is no security.”

Non-GAAP Financial Measures

In addition to reporting financial results in accordance with generally accepted accounting principles, or GAAP, Qualys monitors operating measures of non-GAAP gross profit, non-GAAP gross margin, non-GAAP

operating expenses, non-GAAP operating income, non-GAAP net income, and non-GAAP net income per diluted share. In computing these non-GAAP financial measures, Qualys excludes the effects of stock-based compensation expense, non-recurring expenses and acquisition-related expenses that do not reflect ongoing costs of operating the business. Qualys also monitors Adjusted EBITDA (defined as earnings before interest, taxes, depreciation, amortization, stock-based compensation, other (income) expense, net, non-recurring expenses, and acquisition-related expenses that do not reflect ongoing costs of operating the business). Qualys believes that these non-GAAP operating metrics help illustrate underlying trends in its business that could otherwise be masked by the effect of the income or expenses, as well as the related tax effects, that are excluded in non-GAAP gross profit, non-GAAP gross margin, non-GAAP operating expenses, non-GAAP operating income, non-GAAP net income, non-GAAP net income per diluted share and Adjusted EBITDA.

Furthermore, Qualys uses these operating measures to establish budgets and operational goals for managing its business and evaluating its performance. Qualys believes that non-GAAP gross profit, non-GAAP gross margin, non-GAAP operating expenses, non-GAAP operating income, non-GAAP net income, non-GAAP net income per diluted share, and Adjusted EBITDA provide additional tools for investors to use in comparing its recurring core business operating results over multiple periods with other companies in its industry. Non-GAAP net income and non-GAAP net income per diluted share for the three months ended June 30, 2018 excludes \$0.8 million of amortization of intangibles from acquisitions of Nevis Networks, NetWatcher and 1 Mobility and \$1.6 million of compensation expense from the acquisition of NetWatcher that do not reflect ongoing costs of operating the business.

Qualys has not reconciled non-GAAP net income per diluted share guidance to GAAP net income per diluted share because Qualys does not provide guidance on the various reconciling cash and non-cash items between GAAP net income and non-GAAP net income (i.e., stock-based compensation and non-recurring expenses). The actual dollar amount of reconciling items in the third quarter and full year 2018 is likely to have a significant impact on the Company's GAAP net income per diluted share in the third quarter and full year 2018. Accordingly, a reconciliation of the non-GAAP net income per diluted share guidance to the GAAP net income per diluted share guidance is not available without unreasonable effort.

In order to provide a more complete picture of recurring core operating business results, the Company's non-GAAP net income and non-GAAP net income per diluted share include tax adjustments required to achieve the effective tax rate on a non-GAAP basis, which could differ from the GAAP effective tax rate. The Company believes its estimated non-GAAP effective tax rate of 23% in 2018 is a reasonable estimate under its global operating structure. The Company intends to re-evaluate the non-GAAP effective tax rate on an annual basis. However, it may adjust this rate during the year to take into account events or trends that it believes materially impact the estimated annual rate. The non-GAAP effective tax rate could be subject to change for a number of reasons, including but not limited to, significant changes resulting from tax legislation, material changes in geographic mix of revenues and expenses and other significant events.

The presentation of this non-GAAP financial information is not intended to be considered in isolation or as a substitute for results prepared in accordance with GAAP. A reconciliation of the non-GAAP financial measures discussed in this press release to the most directly comparable GAAP financial measures is included with the financial statements contained in this press release. Management uses both GAAP and non-GAAP information in evaluating and operating its business internally and as such has determined that it is important to provide this information to investors.
