## Preface

Welcome to Qualys Cloud Platform! In this guide, we'll show you how to use the Qualys Security Assessment Questionnaire to streamline your third-party and internal risk assessment processes and to design in-depth surveys to assess security policies and practices of third parties and internal staff, and their compliance with industry standards, regulations and internal requirements.

## About Qualys

Qualys, Inc. (NASDAQ: QLYS) is a pioneer and leading provider of cloud-based security and compliance solutions. The Qualys Cloud Platform and its integrated apps help businesses simplify security operations and lower the cost of compliance by delivering critical security intelligence on demand and automating the full spectrum of auditing, compliance and protection for IT systems and web applications.

Founded in 1999, Qualys has established strategic partnerships with leading managed service providers and consulting organizations including Accenture, BT, Cognizant Technology Solutions, Deutsche Telekom, Fujitsu, HCL, HP Enterprise, IBM, Infosys, NTT, Optiv, SecureWorks, Tata Communications, Verizon and Wipro. The company is also a founding member of the [Cloud Security Alliance \(CSA\)](#). For more information, please visit [www.qualys.com](http://www.qualys.com)

## Qualys Support

Qualys is committed to providing you with the most thorough support. Through online documentation, telephone help, and direct email support, Qualys ensures that your questions will be answered in the fastest time possible. We support you 7 days a week, 24 hours a day. Access support information at [www.qualys.com/support/](http://www.qualys.com/support/)

# Introduction to Qualys Security Assessment Questionnaire

Qualys Security Assessment Questionnaire (SAQ) give you the ability to create campaigns to help you send out questionnaires to any number of users and to collect their risk and compliance data.

Just create templates with your risk and compliance questions and requirements. Create a Campaign using this template, add users and launch the campaign. That's it! We will send out emails to the users and they can start responding to these questionnaires immediately.

## Before you start

Only a user with Manager role can launch and manage Campaigns in SAQ. To create users with manager role you need to set up new users using Vulnerability Management (VM) and grant them access to the SAQ app.

## How do I get started?

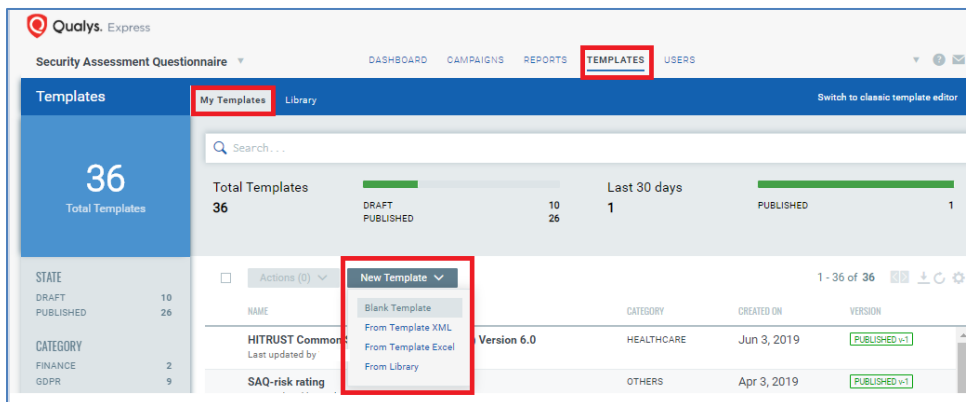

- Build a template
- Add users
- Create and launch campaigns

## Build your templates

A template is where you formulate questions you want users to answer. While creating a template you can add rules, set criticality to the questions, assign risk scores to the template, etc. You can also create copies of a template and customize it for different purposes and audiences.

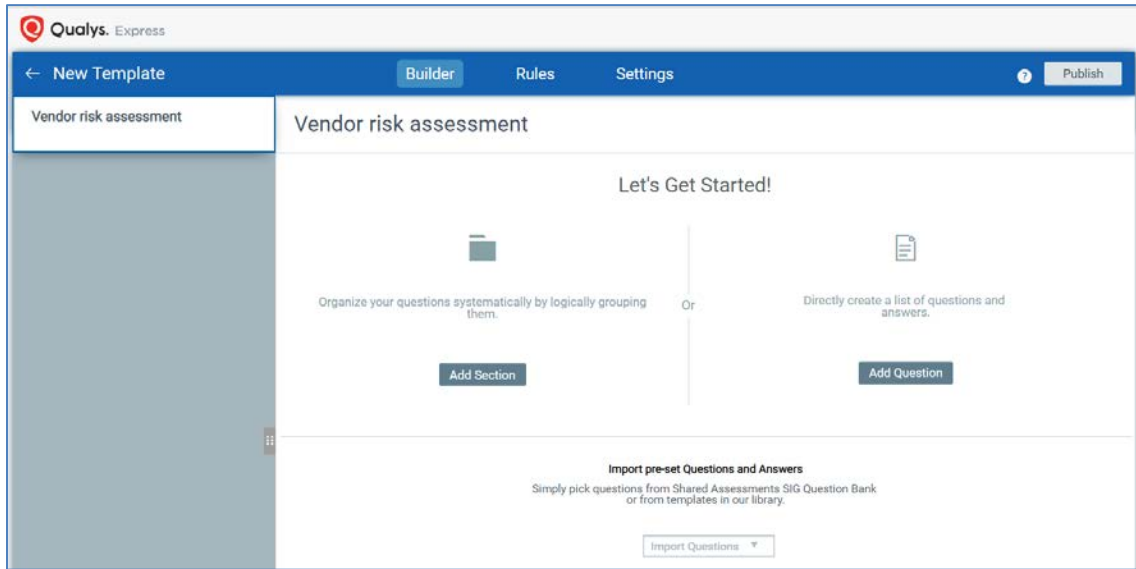

To create a template:

Go to Templates > My Templates and select New Template. You may select one of the four option. For example: select 'Blank Template'

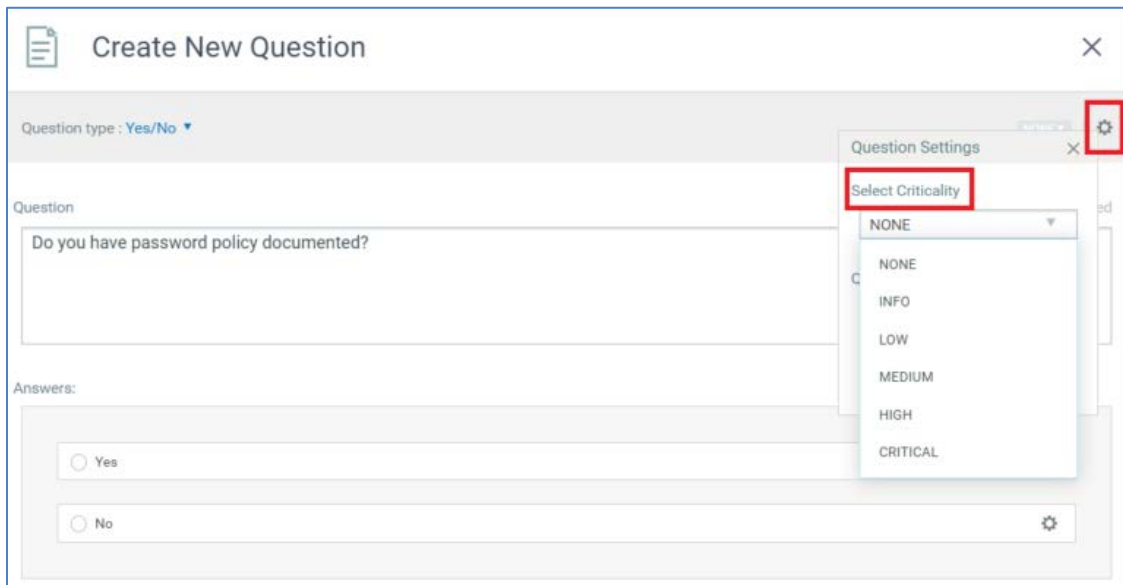

Provide a Template name and a description. Click 'OK'. In the Builder tab of New Template editor, add questions, create rules, specify required attachments, layout, etc.

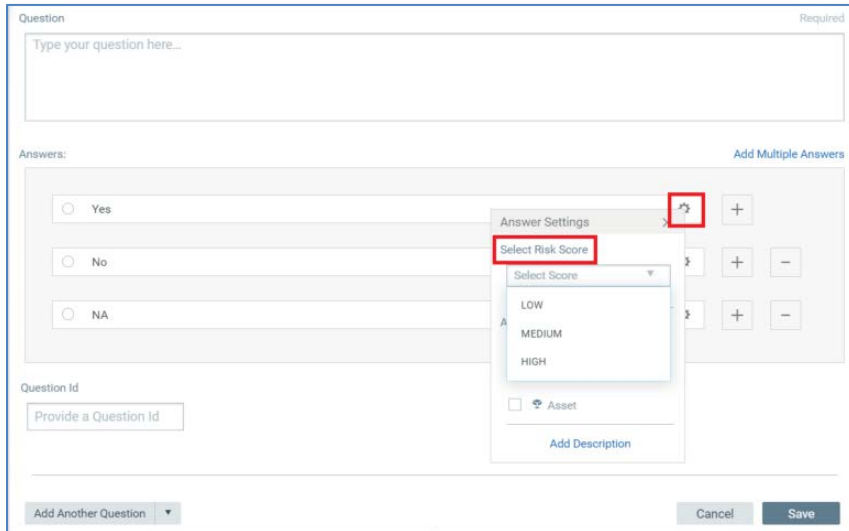

You can also simply pick questions from Shared Assessments SIG Question Bank or from templates in our Library to import in your template.

Set criticality for your questions

Set risk scores for each answer

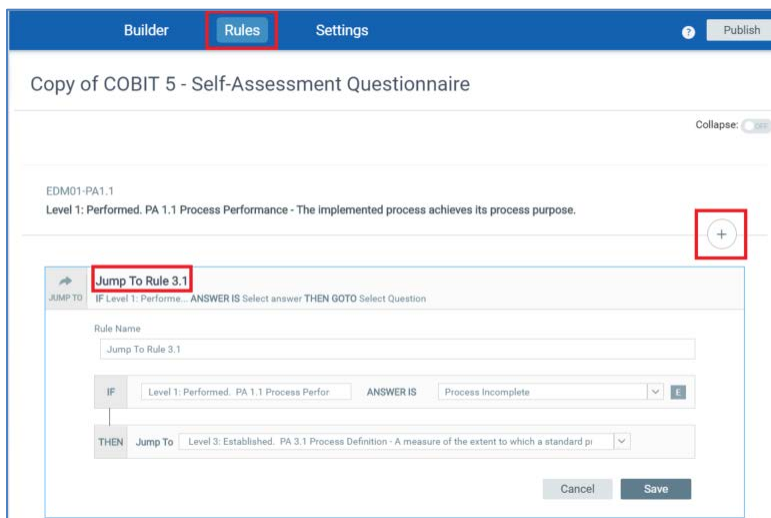

To make your questionnaire dynamic you can configure a template to create rules to show or hide questions in the template. These rules are executed dynamically in the questionnaire for that template, depending on the answers given by the responder

## Manage Rules

To make your questionnaire dynamic you can configure a template to create rules to show or hide questions in the template. These rules are executed dynamically in the questionnaire for that template, depending on the answers given by the responder.

Jump Rule:

Hide Rule:

EDM01-PA1.1  
Level 1: Performed. PA 1.1 Process Performance - The implemented process achieves its process purpose.

**Hide Rule 3.1**  
HIDE IF Level 1: Performed. PA 1.1 Process Perfor... ANSWER IS Select answer THEN HIDE Select Question

Rule Name  
Hide Rule 3.1

IF Level 1: Performed. PA 1.1 Process Perfor ANSWER IS Process Not Assessed E

THEN Hide Level 2: Managed. PA 2.1 Performance Management - A measure of the extent to which the per

Cancel Save

Once all questions are added click on 'Publish' to publish the template so that it can be used for campaign.

Other options of template creations are as mentioned below.

- From Template XML - Import a template as an XML file. Once imported you can use our template editor to make updates as you want.

Questionnaire Template Import

Select XML Template to import

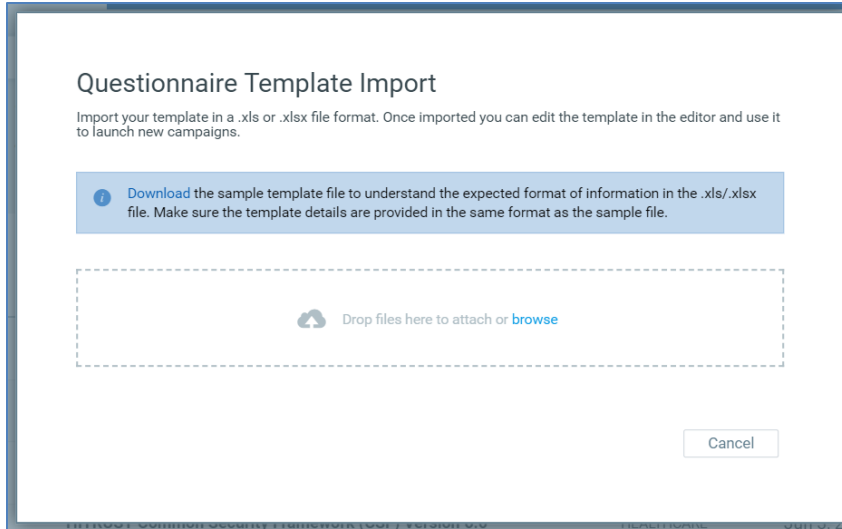

Drop files here to attach or [browse](#)

Use a Qualys XML template file previously exported to XML

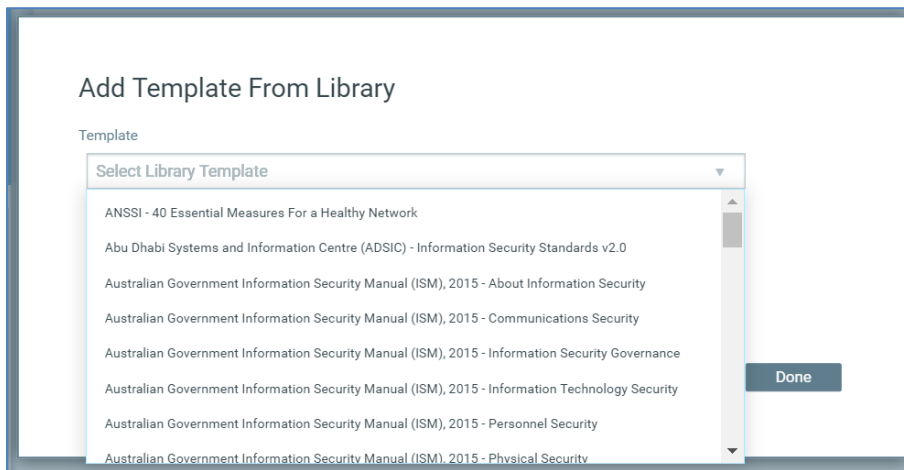

What's next?  
At import time we'll verify the template file data. Once imported you can edit the template and use it to launch new campaigns.

Cancel

- From Template EXCEL - Import template as an Excel (.xls or .xlsx) file. Once imported you can use our template editor to make updates as you want. Make sure you provide the template details in the same format in the sample template. You can download sample template from window witch will open once you select this option.

-From Library: You can directly import out of box templates from Qualys template library and edit it as per your requirement.

If you are creating a template from blank you can start by organizing your questionnaire in sections, subsections and questions. Or you can add sections to a template imported from XML or library.

## Manage Users in Your Subscription

As a Campaign owner you can invite any number of people to your campaign, e.g. employees, partners, vendors or subject matter experts. These users can be in your subscription, outside of your subscription, from your organization, or external to your organization.

Creating a user with Manager role:

To create user with manager role you need to set up new users using VM module and grant them access to the SAQ app. Only a user with Manager role can launch and manage Campaigns in SAQ. Know more

To add a user

Go to SAQ > Users tab and click Add User

Provide all required information about the user and click Add User. This user is now added to your subscription and is listed in the Users tab.

A screenshot of the 'Create New User' dialog box in the SAQ interface. The dialog has a blue header with the title 'Create New User' and a close button. Below the header, there is a section titled 'Enter New User Information' with a clipboard icon. The text below reads: 'Add a new user by entering information below. This will lead to a license being used. [How does a license work?](#)'. The form contains the following fields: 'User License' with a value of 'Total purchased: 5, Currently used: 5'; 'First Name\*' with the value 'John'; 'Last Name\*' with the value 'Graham'; 'Company\*' with the value 'Qualys'; 'Title' with the placeholder 'Enter title'; and 'Email\*' with the value 'John.Graham@Qualys.com'. Below the form, there is a 'Tags' section with the text 'Tags applied to user' and buttons for 'Select', 'Create', and 'Remove All'. A tag 'Pune X' is currently applied. At the bottom, there is a message: 'We'll send the user a registration email with a secure link to the SAQ module.' and two buttons: 'Cancel' and 'Add User'.

## Using CSV to add multiple users:

You can add multiple users by importing a CSV file. The file should contain the first name, last name, company and email addresses of the new users separated by semi-colons. Simply click Choose File or drag and drop the CSV file to import it.

**Questionnaire User Import**

Select User CSV File to import

**Choose File** No file chosen

**Drag file here**

The file shall contain 6 columns: first name, last name, vendor, email address, and optional title, and tag(s)

**What's next?**  
Make sure that your fields are separated by semi-colons.  
At import time we'll verify the user information and add it to the list of users to be invited.

**Cancel**

## Adding users outside of your subscription

You might want to send out questionnaires to users who do not already have access to the SAQ app. Use same process of adding user to add this user. Once a user is assigned to an active campaign, the user will receive an email invitation to log in to the SAQ app and respond to their assigned questionnaire.

## Deleting a user

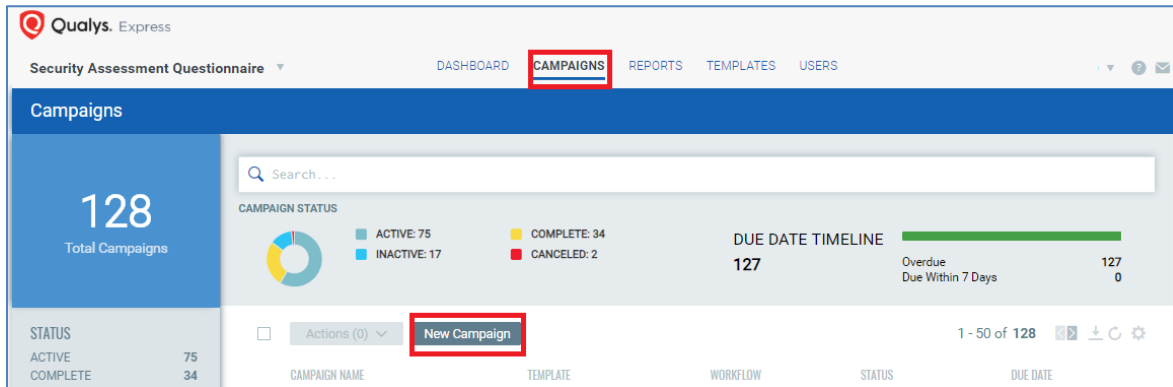

You can delete a user from SAQ if that user is not assigned to an active campaign. To delete user, navigate to the Users tab and choose Delete User from the Quick Actions menu. To delete multiple users in one go, select users in the list and choose Delete User from the Actions menu above the list.

## Create & Launch Campaign

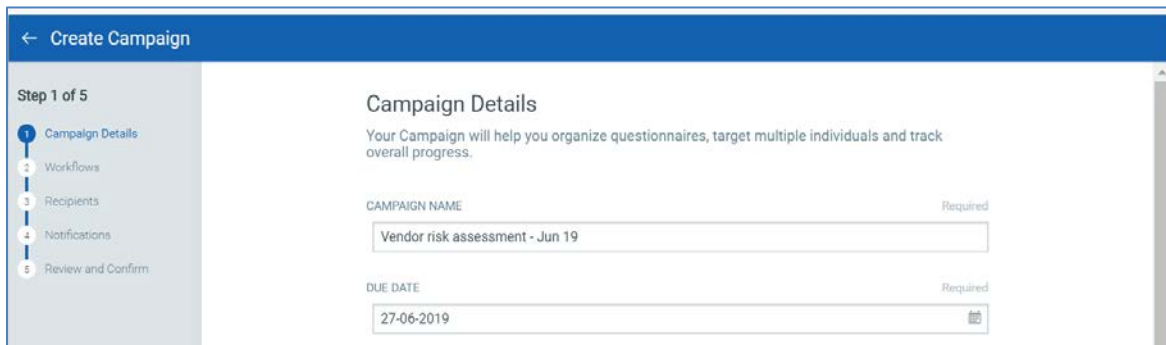

To collect the risk and compliance data you need simply create and launch campaigns to send out questionnaires to all the right people.

What you'll need

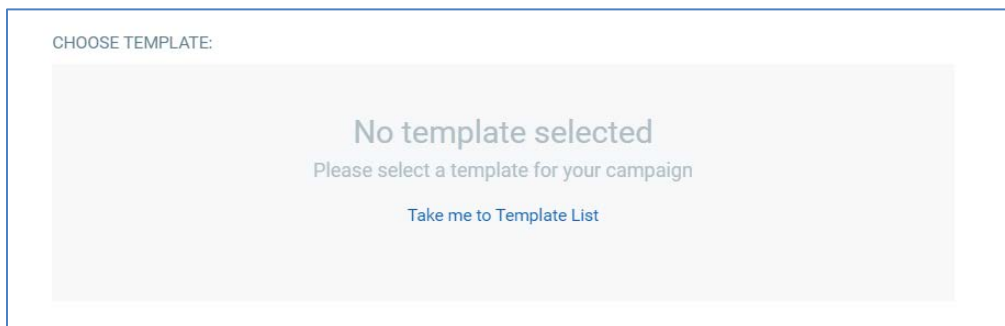

1) Go to Campaigns tab and select New Campaign.

2) Provide a name and due date for your campaign.

3) Choose template for campaign.

#### 4) Choose a workflow as per requirement

Depending on the workflow you choose, the questionnaire answered by the responder is sent for review and approval.

- Simple (2-stage) workflow send the questionnaire to user for information gathering.
- Reviewable (3-stage) workflow sends the answered questionnaire to a reviewer for review. You can also add separate reviewers per section or subsection.
- Full (4-stage) workflow sends the answered questionnaire to a reviewer and an approver.

**Step 2 of 5**

- 1 Campaign Details
- 2 **Workflows**
- 3 Recipients
- 4 Notifications
- 5 Review and Confirm

### Workflows

A workflow refers to tasks and procedural steps that the people involved need to do for each step in questionnaire process. Select from the defined workflows below.

Simple (2-Stage)  Reviewable (3-Stage)  Full (4-Stage)

Stages : Information Gathering > Review > Close

#### Select Workflow Users

ADD REVIEWER: Required

reviewer.r@qualys

[+ Add Section or Subsection Reviewer](#)

#### 5) Add users that you want to send the questionnaire to

**Step 3 of 5**

- 1 Campaign Details
- 2 Workflows
- 3 **Recipients**
- 4 Notifications
- 5 Review and Confirm

### Add Recipients

Invite recipients for your campaign.

No Recipients Invited  
Invite users for your campaign

[Take me to Recipients List](#)

#### 6) Set notifications and reminders for your campaign

**Step 4 of 5**

- 1 Campaign Details
- 2 Workflows
- 3 Recipients
- 4 **Notifications**
- 5 Review and Confirm

### Notifications

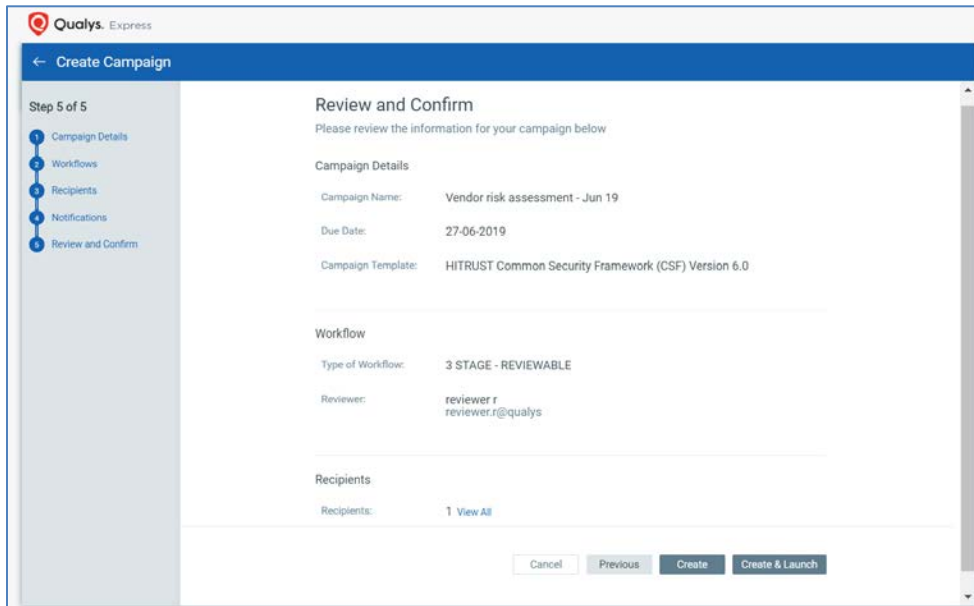

Set notifications and reminders for your campaign.

**Reminder Notifications**  OFF  
Specify when to send notifications once the campaign is launched.

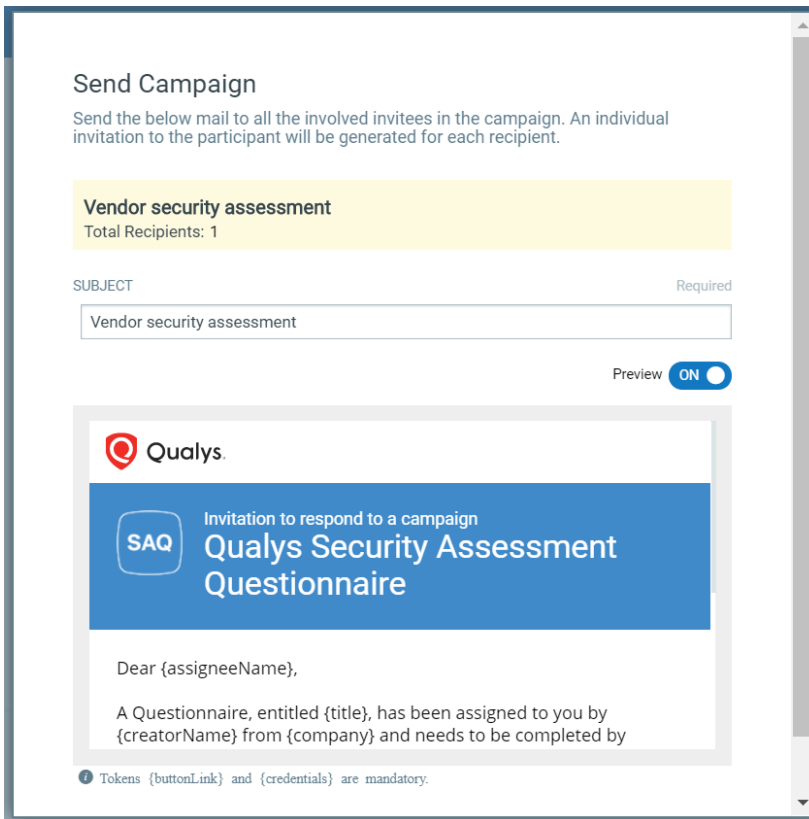

**Due Date Notifications**  OFF  
Specify when to send notifications if the campaign is nearing due date.

**Overdue Notifications**  OFF  
Specify when to stop sending notifications after the due date.

7) Review campaign summary page and click on 'Create & Launch'

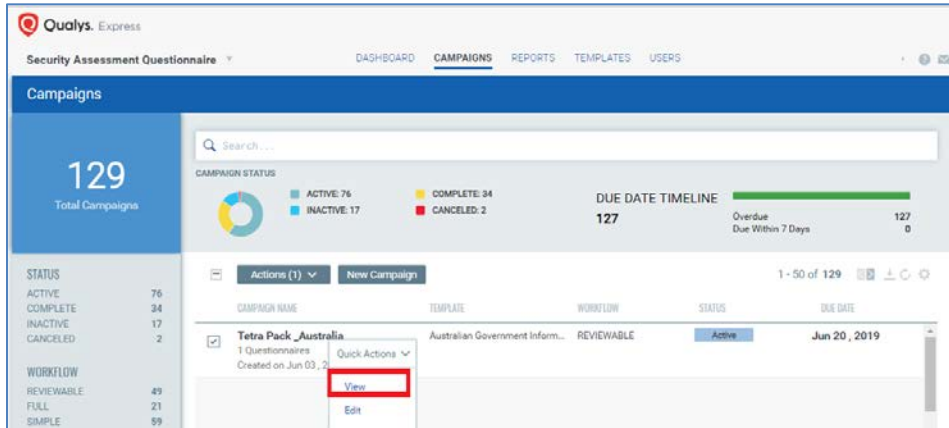

8) Review your campaign notification. You can click on 'preview' button to customize the notification.

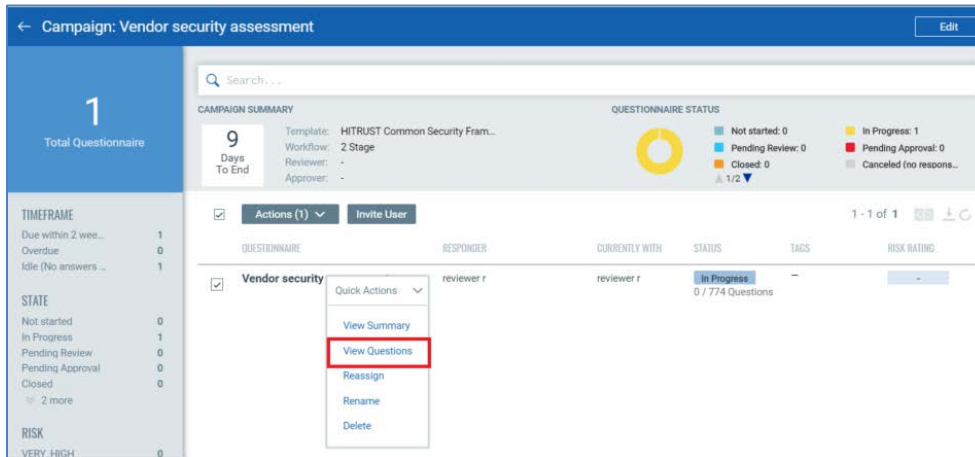

# Monitor responses

You can monitor responses to your campaigns in real time.

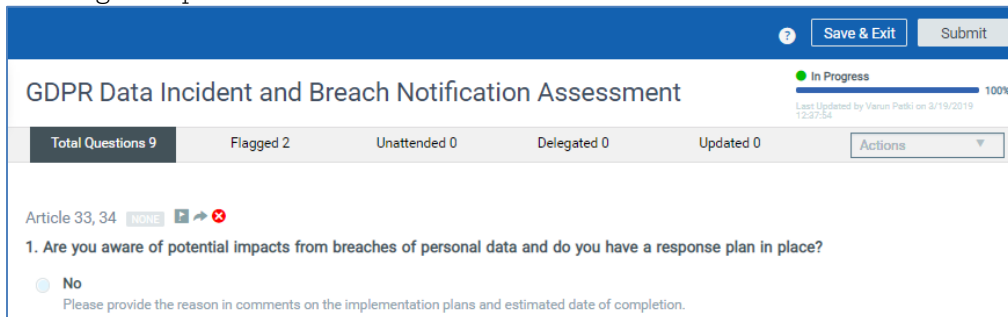

- 1) Go to Campaigns tab and double click on the campaign name for which you want to check the status

- 2) Select a questionnaire, open the Quick Actions menu and choose options to view question, summary etc. Click View questions

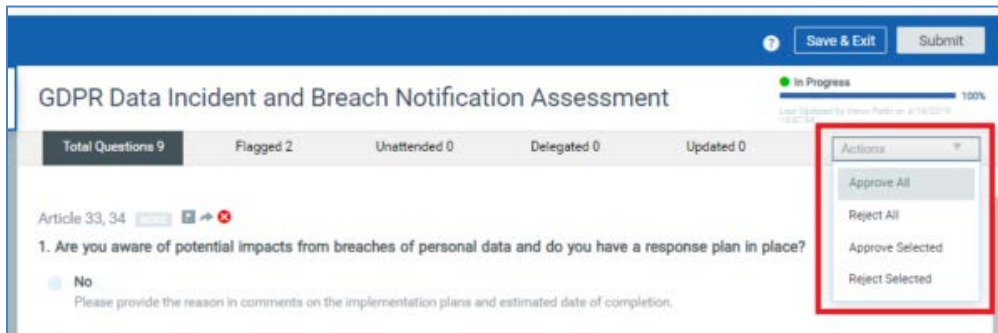

- 3) To filter the questions, click the filter buttons above the questions to display All, Incomplete or Delegated questions.

4) Approve or reject individual answer or all answers at once

Or

If the questionnaire's workflow includes a review stage, it is not complete until all questions are reviewed by reviewer or a delegated user. As you click each question, you'll see Approve and Reject buttons in the question palette. Once you have marked all questions as either approved or rejected, you can submit the questionnaire.

If you've rejected one or more answers the questionnaire will be returned to the responding user. This user will have to correct the rejected answers and resubmit the questionnaire. If you've approved all questions, the questionnaire goes into its next state according to its workflow - either closed or approval.

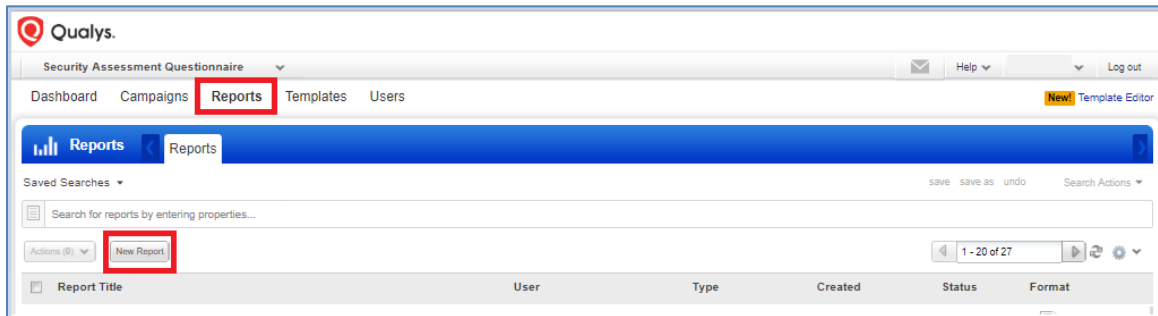

5) If the workflow includes an approval stage the questionnaire remains active and needs to be approved to be closed. Choose View Questions from the quick action menu, click right side of the Approve button (arrow) and choose either Approve or Reject.

## Create Reports to get current views on responses

You can launch reports anytime to get the latest responses submitted by users. You can preview and edit the report results before you generate the final report.

Just go to Reports > New Report, choose your report and we'll walk you through the steps.

### Single Instance Report

This is report on one instance of a questionnaire. An instance is specific to one assigned user. For example, if you launched a campaign and invited 6 users, you'll choose 1 of 6 instances for your report. (You need to be campaign/questionnaire owner to create this report)

### Aggregate Template Report

Report on multiple questionnaires launched from one template. You'll choose a template and, optionally, apply filters. If no filters are applied all questionnaires launched using the template are included. (You need to be campaign/questionnaire owner to create this report)

### Campaign Report

Report on a single campaign. (You need to be campaign owner to create this report)
