

Qualys Certificate View

Release Notes

Version 2.12.0

January 16, 2023

Here's what's new in improvements in Qualys Certificate View 2.12.0!

Issue Addressed

The following issue has been fixed with this release:

The 'Common Name' attribute did not appear in Certificate Authority (CA) details if the 'Common Name' field was empty for a certificate.

This issue is now resolved. The value of the 'organizationUnit' field is now displayed as the certificate common name, even if the 'Common Name' field for a certificate is empty.
