

Qualys Cloud Agent AIX 2.3

January 2019

We're excited to tell you about new features, platform coverage changes, improvements, and bug fixes in this Cloud Agent release. These updates are specific to the agent binary. Qualys Platform backend, UI, and API updates for new features and fixes of management and reporting capabilities of Cloud Agents are documented in the Cloud Suite release notes and may be released on a separate schedule.

New Features

The following new features are available in this release:

- Support for Policy Compliance User Defined Controls (UDCs). When configured in the Policy Compliance module, Cloud Agents with Policy Compliance enabled will run the appropriate Unix User Defined Controls.
- Support for encrypted proxy username and password in proxy configuration files. See the Cloud Agent Linux Installation Guide for information on how to use this feature.
- Added support for proxy configuration in `/etc/sysconfig/qualy-cloud-agent` file

Enhancements

The following enhancements are available in this release:

- Updates and changes to libraries utilized by the Cloud Agent as follows:
 - OpenSSL bundled library upgraded
 - Curl bundled library upgraded
 - Lua bundled library upgraded
 - SQLite bundled library upgraded
 - POCO bundled library upgraded

Behavior Changes

The following behavior changes are present in this release:

- Agent installer package changed to BFF from RPM. See the Cloud Agent Unix Install Guide for instructions.
 - AIX Cloud Agents installed with RPM package will be automatically upgraded to BFF package format during version upgrade.

Platform Coverage Support (Operating Systems)

No new platforms are supported in this release.
