

Qualys Cloud Agent Linux 4.7 (x64)

December 2021

We're excited to tell you about new features, improvements, platform coverage changes, and fixes in this Cloud Agent release. These updates are specific to the agent binary. Platform updates for new features and fixes of management, syncing, tagging, and reporting capabilities of Cloud Agents are documented in the Cloud Platform and Cloud Suite release notes.

New Features

- Added Unix - Wildcard support to use wildcards within the Unix File Content Search controls.
- Added new feature support for PC UDC controls to exclude specific users/groups from the controls.
- Added support for parsing Web Server configuration file for NGINX.
- Added support for the Script Manager module through Command Manifest Route.
