

Qualys Cloud Platform v2.x

Release Notes

Version 2.44.2

March 20, 2020

Qualys Cloud Platform 2.44.2 brings you the following improvements:

WAS Web Application Scanning

- We fixed an issue where the user was unable to upload a Burp Capture proxy in the Application Details tab when create or edit a web application. You can now successfully upload POSTMAN and Burp collection files.
- If a previous scan is still running, the new scan is either launched or skipped based on the current internal status of the previous scan and occurrence type.
