

## Qualys 8.10.0.2 Release Notes

This new release of the Qualys Cloud Suite of Security and Compliance Applications includes the following fixes.

### Issues Addressed

- We fixed an issue where scans launched from the API were very slow for customers with a large number of asset groups in their subscription.
- Now when you purge an agent host from the API we'll delete the VM & PC scan data and the agent host will remain in your account (this is the same way it works in the UI).
