

Qualys Cloud Suite 2.19.02

Qualys Cloud Suite 2.19.02 includes these updates.

CA

- Fixed an issue with editing a custom configuration profile. Now performance parameters are not set to default values while the user is editing a custom profile.

TP

- Fixed an issue where users could not add assets to their ThreatPROTECT license in the Configuration section. Now users can add assets and the error "could not calculate ratio" is not returned.
