

Container Security

Release Notes for Sensor

Version 1.15.0

May 2, 2022

Here's what's new in the Container Security Sensor!

Issues Addressed

- We fixed an issue where Registry sensor crashed as the result of receiving a null value in a JSON payload. Now this exception is handled gracefully to avoid a sensor crash.
- We fixed an issue where CICD sensor crashed when the docker daemon returned a 404 HTTP error code while inspecting an image. Now this exception is handled gracefully to avoid a sensor crash.
