

# Qualys Endpoint Detection and Response v1.x

## Release Notes

Version 1.4

March 10, 2021

Here's what's new in Endpoint Detection and Response 1.4!

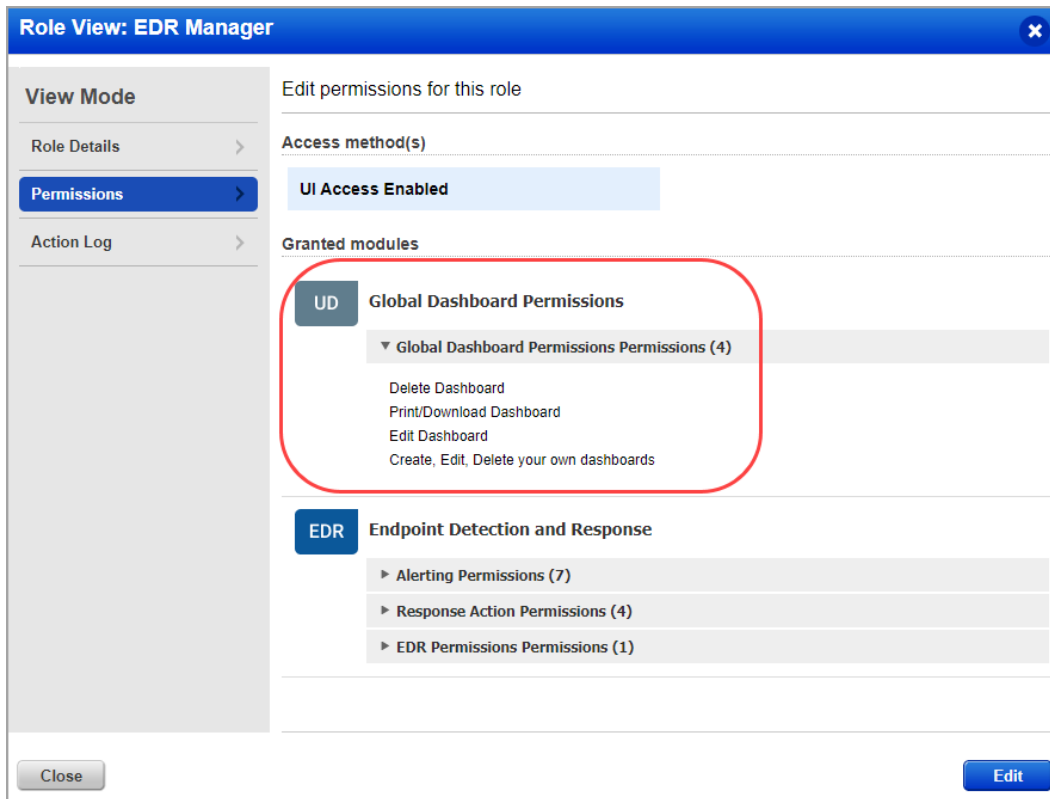

### Global Dashboard Permissions

The dashboard permissions are now applied at the global level for EDR. You can assign these permissions from the Administration Module.

From this release onwards the global dashboard permissions are added to the following pre-created EDR roles:

EDR User – With UI access permission they can only view the dashboard  
EDR Analyst, EDR Incident Responder, EDR Manager - are assigned all Global Dashboard permissions

Note: Any EDR roles created before the EDR 1.4 release has all Global Dashboard permissions.

The screenshot displays the 'Role View: EDR Manager' interface. On the left, a sidebar shows 'View Mode' with options for 'Role Details', 'Permissions' (selected), and 'Action Log'. The main content area is titled 'Edit permissions for this role' and includes sections for 'Access method(s)' (UI Access Enabled), 'Granted modules', and 'Endpoint Detection and Response'. The 'Global Dashboard Permissions' module is highlighted with a red circle and lists four permissions: 'Delete Dashboard', 'Print/Download Dashboard', 'Edit Dashboard', and 'Create, Edit, Delete your own dashboards'. The 'Endpoint Detection and Response' module lists three permission groups: 'Alerting Permissions (7)', 'Response Action Permissions (4)', and 'EDR Permissions Permissions (1)'. A 'Close' button is at the bottom left and an 'Edit' button is at the bottom right.
