

Qualys Out-of-Band Configuration Assessment

Release Notes

Version 1.4

September 10, 2020

Here's what's new in Out-of-Band Configuration Assessment (OCA) 1.4!

[Support for New Technologies](#)

[Edit Asset Details](#)

[New Commands for ArubaOS 6.x](#)

[UI Change](#)

Support for New Technologies

We now support the following new technologies through the OCA app for compliance assessment:

- ArubaOS 8
- Riverbed SteelHead Interceptor 7
- IBM z/OS Security Server RACF 2

You can now run the Policy Compliance Reports on these technologies to view your compliance posture.

Edit Asset Details

You can now edit the assets details. To edit the details, select the required asset and from the Quick Actions menu select Edit. On the Edit Asset window, make the required changes and click Save.

The screenshot displays the OCA app interface. On the left, a list of assets is shown with a 'Quick Actions' menu open for 'FireEye- Asset-54'. The 'Edit' option is highlighted with a red box. A red arrow points from this 'Edit' option to the 'Edit Asset Details' form on the right. The form contains the following fields:

Asset Name	Asset ID	Technology	IP Address	Last Seen
FireEye CMS 8	1fc79066-f5ce-4dba-80a5-29bea30b67bd	PC	96.98.22.39	Sep 8, 2020
ACME Packet OS	eb95dfc3-dc99-4939-b2c1-3eecd50a-e647-41ea-8669-e722a476-17e6-4ba0-85d5-3eecd50a-e647-41ea-8669-e722a476-17e6-4ba0-85d5	PC	96.81.69.37	Sep 8, 2020
Comware 7	3eecd50a-e647-41ea-8669-e722a476-17e6-4ba0-85d5	PC	125.101.36.82	Jun 15, 2020
Symantec SGOS 6	e722a476-17e6-4ba0-85d5	PC	59.83.25.15	Sep 7, 2020

Field	Value
Hostname	FireEye- Asset-54
Netbios	Netbios60
MAC Address	73-79-54-52-84-48

New Commands for ArubaOS 6.x

For better coverage, we have now added the following new commands to ArubaOS 6.x technology:

- show running-config
- show snmp trap-hosts
- show web-server profile
- show firewall

You can now run these commands on ArubaOS 6.x and upload the output to view your compliance posture.

UI Change

The **Technology** column under Asset and Technology tab is now renamed to **Technology Version**.
