

Qualys Patch Management

Release Notes

Version 1.4.6

February 26, 2021

Here's what's new in Patch Management 1.4.6!

[“Save & Enable” Option Added to Enable a New Job](#)

[Option to Minimize the Job Progress Window](#)

[Only Run-Once Jobs are Marked Completed](#)

[Job Wizard's Confirmation Screen to Show Job Schedule type](#)

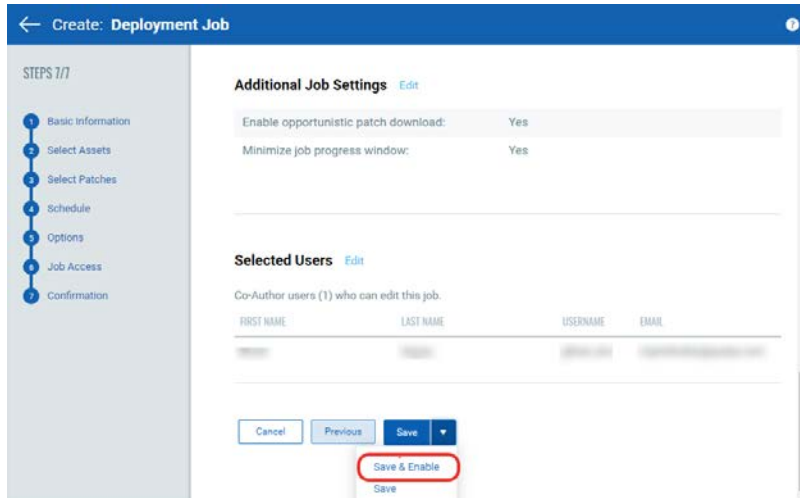

[Global Dashboard Permissions](#)

[Whitelist URLs List Updated](#)

“Save & Enable” Option Added to Enable a New Job

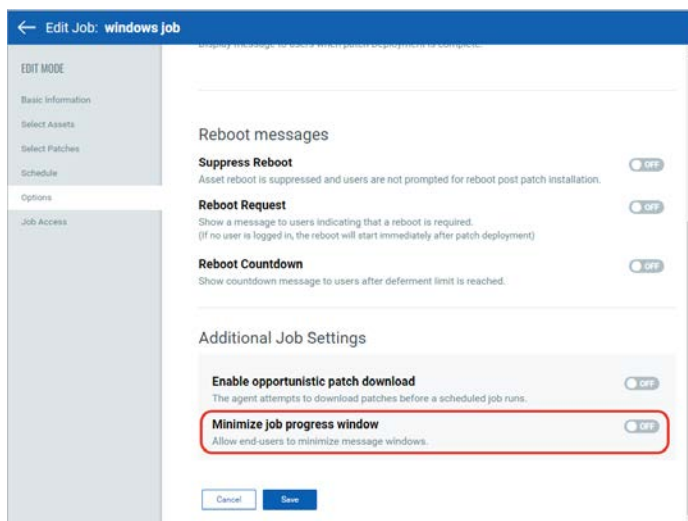

With this release, we have removed the “Create job in Enabled State” toggle option from the Options tab > Additional Job Settings section. You will now find this option on the confirmation page when you save a new job. Select “Save & Enable” from the “Save” drop-down button to enable the job as soon as you save the job. This option is available only when creating a Job the first time, not during editing the job.

Note that You should review the configuration and ensure that job is correctly configured if you are choosing this option.

Option to Minimize the Job Progress Window

The user can now minimize the job progress window shown on the user machine when the patch job is in progress. We have added an option “Minimize job progress window” in the create/edit job > Options > Additional Job settings section. Turn on this option to display the minimize button on the job progress window.

Only Run-Once Jobs are Marked Completed

We show Completed status only for Run-Once jobs (On-Demand and non-recurring Scheduled job). An On-Demand job is marked "Completed" when it is Enabled. A Run-Once job (non-recurring Scheduled job) is marked Completed after the start time of the job on the asset that last on the time zone. The scheduled recurring jobs are never marked Completed.

Create: Deployment Job

STEPS 4/7

- 1 Basic Information
- 2 Select Assets
- 3 Select Patches
- 4 **Schedule**
- 5 Options
- 6 Job Access
- 7 Confirmation

Schedule Deployment

Schedule the deployment job to run on demand or in the future.

On Demand Schedule **Schedule:** Schedule the deployment job to run at a set time.

START DATE: 02/10/2021 START TIME: 2:46pm Recurring Job

TIMEZONE: By default the system will use the agent timezone. [Set timezone](#)

Patch Window
You can configure a patch window to run the deployment job only within a particular time frame.

None Set Duration

Note: Not setting the patch window will allow the cloud agent to take as much time as it needs to complete the job.

The Jobs list page showing Run-Once jobs marked as completed in the **Status** column.

Patch Management | DASHBOARD | PATCHES | ASSETS | **JOBS** | CONFIGURATION

Jobs

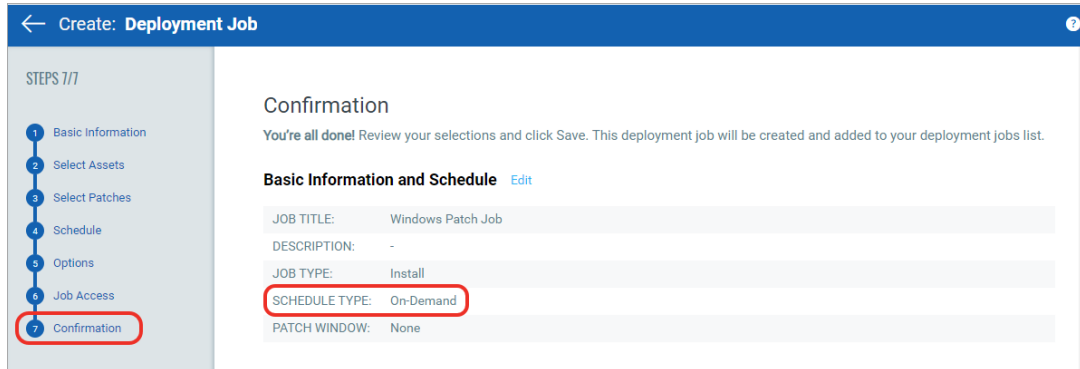

3 Total Jobs

status: 'Completed'

STATUS	NAME	OWNER	SCHEDULE	PATCHES	ASSET COUNT		
					ASSETS	TAGGED ASSETS	TAGS
Completed	Run once 3 Install Job	gtham_bw Aug 20, 2020	On-Demand	2	2	0	-
Completed	Run once 2 Install Job	gtham_bw Aug 20, 2020	Once, Aug 20, 2020 11:06 pm	2	0	0	Cloud Agent
Completed	Run once Install Job	gtham_bw Aug 20, 2020	Once, Aug 21, 2020 04:05 pm	2	0	0	Cloud Agent

Job Wizard's Confirmation Screen to Show Job Schedule type

When you define a job, we will now also show you the schedule type of the job in the Confirmation step. The valid values are: 1) On-Demand, 2) Run-Once, 3) Recurring – daily, 4) Recurring – weekly, and 5) Recurring – monthly.

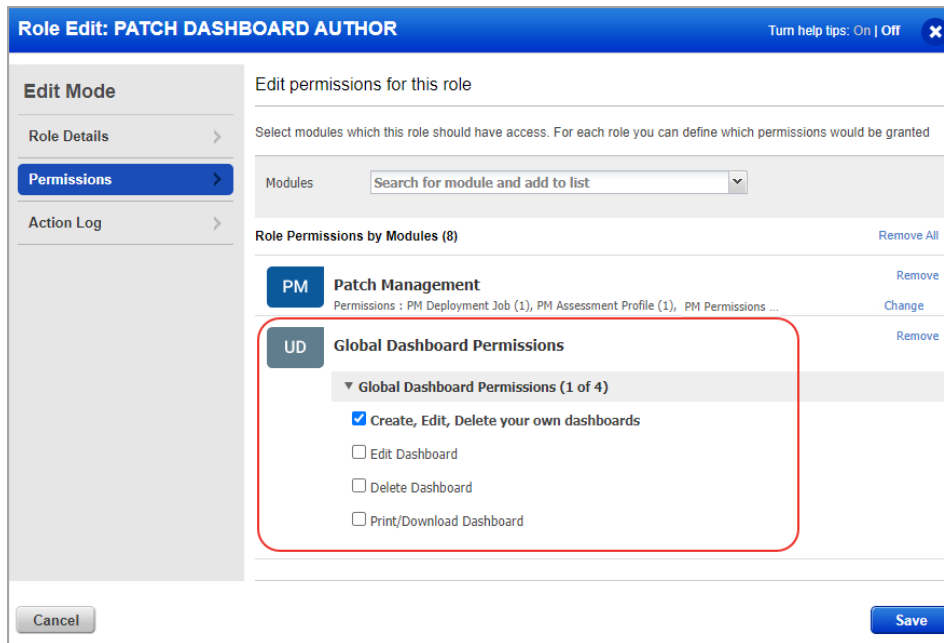

Global Dashboard Permissions

As Patch Management is already integrated with Unified Dashboard, we will now refer to the newly introduced Global Dashboard Permissions to determine the dashboard permissions for the PM user roles. With the Global Dashboard Permissions referred for PM/Unified dashboard permissions, the corresponding dashboard permissions that were set using the PM Dashboard Permissions will be discontinued. All the existing users will be migrated to the new global dashboard permissions.

The Global Dashboard Permissions will only allow the Patch Manager, Patch User and Patch Dashboard Author to create, edit and delete their own dashboards. For permissions to edit, delete other users' dashboard and print/download dashboard, contact SuperUser or Administrator.

Privileges	Patch Manager	Patch User	Patch Dashboard Author	Patch Reader	Patch Security
Global Dashboard Permissions					
Create, Edit, Delete your own dashboards	Y	Y	Y		
Edit Dashboard					
Delete Dashboard					
Print/Download Dashboard					

Whitelist URLs List Updated

We have updated the list of URLs that you must whitelist for the Cloud Agent to successfully download patches on your assets.
