

# Qualys Network Passive Sensor v1.x

## Release Notes

Version 1.5.5

September 25, 2023

Qualys Network Passive Sensor 1.5.5 brings you many more improvements and updates!

### Issues Addressed

With this release, we fixed an issue where the Network Passive Sensor application crashed when the user clicked the **Interface Settings** of an **Unregistered Sensor**. We have improved the workflow to ensure that the Network Passive Sensor application no longer crashes if Interface Settings data is unavailable for unregistered sensors.
