

Qualys Secure Enterprise Mobility (SEM)

Release Notes

Version 1.2

November 16, 2021

What's new in SEM 1.2

[Introducing Microsoft Intune Integration](#)

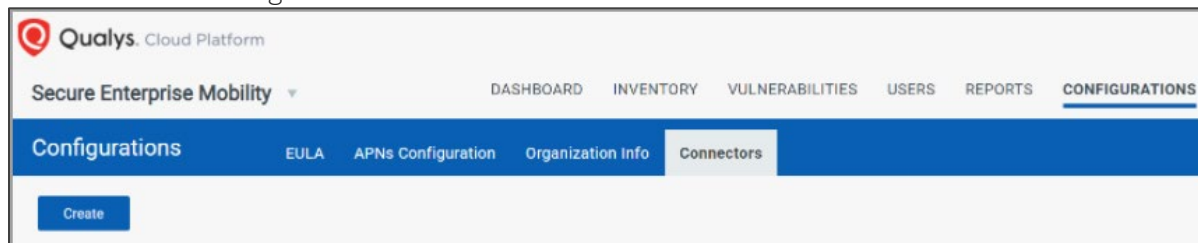

[Exposing SEM APIs](#)

[Adding User-based Tags](#)

[New Attributes in the Vulnerabilities CSV Export](#)

Introducing Microsoft Intune Integration

Qualys integrates with Microsoft Intune to provide VMDR for Android and iOS devices agentless, i.e., without installing the Qualys Cloud Agent. As part of **phase 1**, you can configure the Microsoft Intune connector and sync your devices with the Qualys Cloud Platform through the Intune API. You can get the inventory and vulnerabilities assessment and perform a few of the actions Over-the-Air on the vulnerable devices agentless.

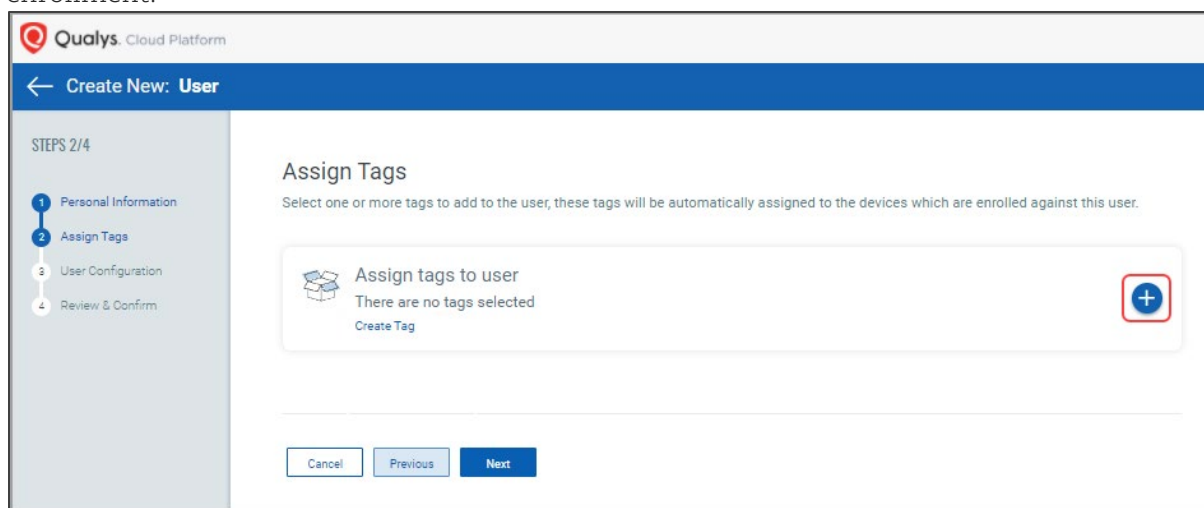

Exposing SEM APIs

SEM 1.2 introduces support for the SEM API to get the assets and detection list exported from SEM to your internal ecosystem. All routings to SEM API are diverted through the API gateway, which handles authentication and authorization for SEM. Refer to <https://www.qualys.com/documentation/> for more information on the SEM API User Guide. In this release, we are exposing assets and their detection list API.

Adding User-based Tags

With this release, we introduce automatic tag assignment to assets immediately after enrollment. When creating a new SEM user, you can define the tags you want to associate with the assets immediately after enrollment. When the SEM user enrolls an asset using the QR code or credentials, the tags associated with that SEM user are automatically assigned to the asset immediately after enrollment.

New Attributes in the Vulnerabilities CSV Export

With this release, we have added the following attributes as part of the vulnerabilities CSV export:

- CVSSv2 Base Score
- CVSSv2 Temporal Score
- CVSSv3 Base Score
- CVSSv3 Temporal Score
- Result

- CVEIDs

A	B	C	D	E	F	G	H	I	J	
QID	Title	CVEIDs	Severity	Released On	Vulnerability Count	CVSSv2 Base Score	CVSSv2 Temporal Score	CVSSv3 Base Score	CVSSv3 Temporal Score	Result
610011	Google Pixel A CVE-2019-		5	08-Aug-19	5			9.8		8.5 Android OS Security Patch Level or
610066	Apple iOS 13.5 CVE-2019-		5	10-Dec-19	4			8.8		7.7 Apple iOS Version on Device : 12.4
